- HTML5, CSS3, JavaScript
- WordPress, SFCC, SFRA
- Tailwind CSS, SASS
- VersionControl (Git, Bitbucket)

SPECIALIZED EXPERIENCE

Daffah

Oct, 2024 - till now
Riyadh, Saudi Arabia
Web developer

Duties & Responsibilities

- Designed, developed, and maintained the company's e-commerce website using **Magento**.
- Enhanced the website's frontend and backend functionalities using **HTML, CSS, JavaScript, jQuery, Bootstrap, PHP, and MySQL**.
- Integrated **Odoo** and **OTO** systems with Magento to streamline product, order, and inventory management.
- Developed and maintained custom **APIs** for seamless communication between platforms.
- Deployed and managed the website using **aaPanel** for server administration.
- Ensured optimal website performance by monitoring and troubleshooting server-side issues.
- Handled hosting configurations and optimized the server environment for speed and scalability.
- Resolved critical order synchronization issues between Magento and Odoo to ensure accurate order statuses.
- Implemented modern, responsive designs for a user-friendly shopping experience.
- Enhanced the website's navigation, product pages, and checkout process for better customer engagement.
- Customized Magento modules to support business requirements, including promotional campaigns and discount codes.
- Prepared and implemented promotional campaigns, including collaborations with partners like **Al Rajhi Bank** (e.g., "Blue Week" discounts).
- Regularly performed updates and optimizations to improve website loading speeds and overall performance.
- Conducted debugging and resolved technical issues affecting the website's performance and functionality.
- Worked closely with the marketing manager and other stakeholders to align website functionalities with business goals.

Prototyping Technology

Nov, 22 – Oct, 2024
Jeddah, Saudi Arabia
Web developer

Duties & Responsibilities

- Translated **UI/UX designs** into functional and **responsive code** for seamless user experiences.
- Converted design mockups into **interactive web interfaces** using **HTML, CSS, and JavaScript**.
- Utilized frontend frameworks and libraries like **React.js** to develop **reusable components** and streamline development processes.
- Ensured websites and applications were **responsive** and **optimized** for various devices and screen sizes.
- Managed **code repositories** using **Git**, tracked changes, and collaborated with team members to maintain **code integrity**.
- Conducted thorough **cross-browser testing** to ensure compatibility and consistency across different web browsers.
- Optimized frontend performance by **refactoring code**, minimizing **load times**, and reducing

asset sizes.

- Conducted **testing and debugging** of frontend code to identify and resolve issues, ensuring functionality and reliability.
- Collaborated with **designers, backend developers**, and other team members to coordinate project tasks, share ideas, and troubleshoot issues effectively.

DigitsCom Technologies

Nov, 2020– October, 2022

Mansehra, Pakistan

Software Engineer (SFCC Web developer)

Duties & Responsibilities

- **Analyzed, debugged**, and resolved problems related to **e-Commerce** and **SFCC implementation**.
- Developed, tested, and deployed **e-Commerce (SFCC) applications** aligned with business requirements.
- Wrote **backend batch jobs**, worked with **controllers, scripts**, and **ISML templates**, and utilized **Business Manager** for merchandising **products, catalogs, promotions, content slots**, and **assets**.
- Created functionalities as per **SFRA/Site Genesis Framework** specifications and standards.
- Developed and maintained **custom cartridges** for **Site Genesis** and **SFRA** to extend platform capabilities.
- Fixed **bugs** in ongoing projects and implemented new feature requirements to meet client and stakeholder needs.
- Integrated **third-party services** like **Adyen** using the **SFCC services framework** for enhanced functionality.
- Attended daily **Scrum meetings** to discuss project progress, sprint planning, and releases, utilizing **JIRA Agile** for tracking tasks.
- Regularly updated the **Team Lead** and **Project Manager** on the progress of assigned tasks and milestones.

URRAAN

Sep, 2020– Oct, 2020

Abbottabad, Pakistan

Frontend Developer

Duties & Responsibilities

- Designed and developed responsive website layouts using **HTML, CSS, Bootstrap**, and **JavaScript**.
- Converted **PSD** and **Figma** designs into pixel-perfect HTML markup.
- Added interactive functionalities to web pages using **jQuery** for improved user experiences.
- Ensured cross-browser compatibility and optimized performance for various devices.
- Utilized front-end frameworks such as **Bootstrap** and **React.js** to streamline development processes.
- Integrated data from **MySQL** databases and **PHP** backend servers into dynamic web pages.
- Maintained and enhanced websites post-deployment to improve performance and resolve issues.
- Collaborated with UI/UX designers and cross-functional teams to implement features and resolve technical challenges.
- Evaluated and optimized code for industry standards, ensuring proper structure and compatibility with browsers and operating systems.
- Implemented **SEO** best practices to improve website visibility and search engine rankings.
- Utilized **Git** for version control and efficient code management.
- Attended daily **Scrum meetings** to discuss project progress, roadblocks, and deliverables.
- Prepared weekly reports on work progress and updated Team Leads and Project Managers regularly.

Projects: -

SFCC Projects:

Dynamite Clothing (CA/US) – SFCC React

- Created React Components for SFCC, including frontend development.
- Enhanced Homepage Products functionality with dynamic content loading and infinite scroll.
- Implemented add to cart functionalities with a custom React modal for intuitive user experience, including edit button and product details.
- Optimized Cart behavior and resolved related bugs, improving checkout flow and conversion rates.

JLR Multi Sites (GB/US/CA) – SFCC PWA React

- Implemented AutoShip features, including Recurring Order, Swapping/Canceling/Removing AutoShip Products, and New Inventory.
- Create a hidden category accessible through a specific link.
- Executed bug fixes, changes, and additional implementations for a smooth user experience.

Scarpamondo – SFRA

- Upgraded PayPal Cartridge (updated the old PayPal cartridge with a new one with some new Business Manager configurations).
- Cart functionality and add to cart products (ensured smooth functionality from homepage to PLP and then PDP).
- Wishlist Tooltip (shown around the Wishlist icon during the first visit on PDP/PLP/Recommendations).
- Wishlist Optimization (Add to Wishlist product from cart and mini-cart page don't show Add to Wishlist and don't add to Wishlist if the product is already in Wishlist).
- Bugs fixing related to Wishlist on QB/PLP/PDP/cart page/Recommendations.

Other Projects:

Restaurant Services

- Contributed to the development of a MERN application for food ordering.
- Created a hidden category accessible through a specific link.

Real Time Vehicle Tracking app using Smartphone (Final Year Project, Bachelor's)

- Developed a React, Flutter, CSharp, and MongoDB-based real-time vehicle tracking app.
- Enhanced tracking capabilities for transportation companies, rental car managers, and government agencies.
